

I want to vote against HR 4026, I benefit from listening to XM Radio, from the weather and the traffic channel. I am a truck driver and by listening to this station it benefits me from being stuck in traffic and being able to go around accidents. Especially when I go thru different towns and it helps us alot. It lets us know what we can avoid. XM Radio is the best thing that ever happen to our trucking business. We get signal all over the place now.
